Environmental Efforts

Reduction of Environmental Load Through Business

Many of our products use materials derived from exhaustible resources. By planning, manufacturing and selling as a product that can be used repeatedly and for a long time, we believe that it will lead to effective utilization of limited resources and reduction of environmental load.

- We acquired ISO14001 certification in 2005. We strive to improve management structures and reduce environmental impacts, such as re-use of shredded waste cloth material.
- Development of reusable infection prevention products
- Considering not only ourselves but hospitals, we developed new product "COMPELPACK", which shifts "Re-use" from "Disposable", and has sold it. "COMPELPACK" is the surgical wear which enables hospital to reduce waste and be more economical.
- Introducing HV vehicles to commercial vehicles
- Installed a solar power generation panel on the roof of the head office building

Addressing Climate Change Issues

As a climate change disclosure based on TCFD, we plan to implement a formulation process for scenario analysis, such as mitigation and adaptation efforts for climate change problems, identification of opportunities and risks, etc.
